

Year 3 -4

Geography

Bringing it to Life Questions

What do you observe?

Make observations through the 7 key concepts about local and national places and environments in order to compare them.

Using your senses what do you notice about these places?

Where are these places located?

How is the space used?

How do people look after these places?

What do you observe?

What are your questions?

Geographical questions about similarities and differences between places, environments and resources at local and national scales.

**What questions could you investigate?
Why is this, where it is?
What are the similarities and differences**

- between places**
- between environments?**

How is the space organised?

What are your questions?

What can you do to find out?

Collect and record geographical information about the characteristics, features and use of places and environments.

What is the best way to find out? What could you do?

Where can you look for data?

What other sources are useful?

Who could you interview?

What can you do to find out?

How can you represent this?

Visually representing the location and features of places.

How can you compare the features of different places?

How can you represent the space and how it is organised?

How can you show the patterns? What needs to be included?

How could you show the connections between parts?

How can you represent this?

How can you make sense of this?

**Interpret geographical data to identify distributions and patterns.
Use this to draw conclusions.**

What does your information show?

How might you explain this?

What effect has change had?

How does the way people think and feel about a place influence their ideas and actions?

Why do people connect with this place?

How can you make sense of this?

How can you share ideas and respond?

Use geographical terminology to present and communicate your ideas and how you might act or respond as a result of your learning.

How can you share what you found?

How has this changed what you think or how you might act in the future?

Who might be able to use this learning?

How do people's views about this place influence how they care about it?

How can you share ideas and respond?
