

Instructions for Playing Family Feud

- Divide the staff into two teams, Team A and Team B. Each team selects a team captain.
- Flip a coin to see which team will start.
- This version consists of four rounds.

Round 1

- Pose the first question that has already been answered by a survey of 100 people.
- This team has a chance to confer with each other before the captain calls out their best answer.
- The team that has the control tries to reveal all of the survey responses to the question before receiving three strikes.
- * Note: It is worth pointing out, that participants might say a correct response to the question but if it is not in the responses from the 100 people surveyed, they don't get any points for it.
- Each answer is worth 5 points if it appears on the board.
- If the team uncovers all the answers on the board without any strikes they get all the points.
- If the team receives three strikes without clearing the board, control is passed to the other team.
- The other team who now has the control gives one answer in the hopes that it is found on the board.
- If it is, all the points from the round are added to their team's score.

Rounds 2, 3 and 4

- Repeat all the steps until all the questions have been asked.
- **The team with the most points wins the game!**
