## **F-2**

What do you notice?

What do you think?

What do you think if...?

How can you explore?

How can you share?

So what?

## **3-4**

What do you notice?

What patterns and relationships can you see?

What do you think if...?

How can you explore?

How can you review and communicate?

So what? What next?

## **5-6**

What do you notice?

What patterns and relationships can you see?

What do you predict?

How can you test it?

How can you review and communicate?

So what? What next?

# The BitL tool – Bringing it to Life **Science 7–10**

## 7–8

What do you observe?

What patterns and relationships can you see?

What do you predict will happen?

What investigations could you design?

How can you review and communicate?

So what? What next?

## 9–10

What do you observe?

What patterns and relationships can you see?

What do you predict will happen?

What investigations could you design?

How can you review and communicate?

So what? What next?
